WORK EXPERIENCE

завзятий господар
Full-Stack Developer (Aug 2024)

• Launched an advanced and secure e-commerce platform with TypeScript for type safety and maintainability.

• Implemented auto-updating home page with new products, top-rated items, and best offers.

• Developed comprehensive shop page with category, rating, and price filters, and "Add to Cart" functionality.

• Created detailed product pages with descriptions, stock information, customer reviews, and related products.

• Managed robust cart functionality including product quantity adjustments and seamless checkout.

• Secured account management with two-factor email verification and detailed account settings.

• Enabled full order tracking with downloadable invoices and receipts.

• Enhanced security with rate limiting, token-based authentication, and role-based access control.

• Implemented notifications for suspicious activities and account changes.

FashFlash
Full-Stack Developer (May 2024)

• Crafted a feature-rich web application independently.

• Implemented advanced filtering for product search and detailed product information display.

• Developed user authentication with session persistence.

• Implemented multiple user roles for varied permissions.

• Enhanced security with email verification and login blocking.

• Managed order notifications and refund requests.

• Administered platform via a comprehensive dashboard.

• Optimized business logic for enhanced security.

Meta React Native Bootcamp
React Native Developer (Oct 2023)

• Gained proficiency in cross-platform mobile app development.

• Covered essential concepts including data handling, version control, and React basics.

• Developed a Capstone project.

• Honed programming skills in JavaScript.

Eshop Mobile App

Full-Stack Developer (Sep 2023)

• Developed a fully functional e-commerce Android app from scratch.

• Managed backend data and implemented Redux for user session persistence.

• Added user-friendly cart and authentication features.

• Leveraged Laravel for backend service efficiency and reliability.

Clothes_Shop

Frontend Developer (Jul 2023)

• Built a React and Redux-powered e-commerce platform.

• Streamlined interface for easy exploration of categories and products.

• Implemented secure user authentication with Google and email sign-ins.

• Powered the platform with Firebase for reliability and efficiency.

Weather App

React Native Developer (Sep 2023)

• Developed a React Native weather app for global weather updates.

• Created an intuitive interface with personalized city selection using AsyncStorage.

• Designed a visually pleasing user interface.

EDUCATION

Faculty of Arabic Language

Al-Azhar University (2019-2025)

CERTIFICATIONS
